(54) Title: LIQUID CRYSTAL DISPLAY AND DRIVING METHOD THEREOF
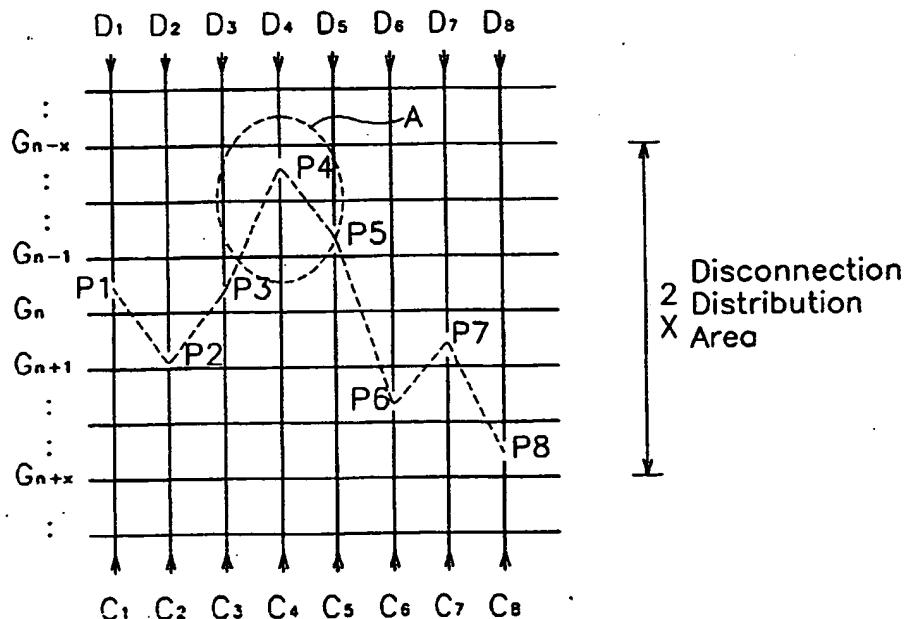

(57) Abstract: An LCD includes a plurality of upper, middle, and lower gate lines transmitting scanning signals provided on upper, middle, and lower areas, respectively, a plurality of pairs of upper and lower data lines transmitting data voltages, and a plurality of pixels connected to the gate lines and the data lines. The pixels are arranged in a matrix and include upper, middle, and lower pixels provided on the upper, the middle, and the lower areas, respectively. Each pair of upper and lower data lines are separated from each other at a disconnection, and the disconnections of the upper and the lower data lines are randomly distributed on the middle area.
